# Arduino

Follow

This org contains the official Arduino tools (IDE, CLI...), documentation and cores. See **@arduino-libraries** for the official libraries.

Verified

**5.4k** followers https://www.arduino.cc @arduino

README.md

## 🤗 Welcome to the Arduino open source community!

This organization hosts the various open-source projects managed by the Arduino team, including:

- Tools
  - IDE: 1.x - 2.x
  - Command line: CLI - Lint - FWUploader
  - Misc: create-agent
- App Lab / UNO Q
  - App Lab: arduino-app-lab
  - Command line and tools: arduino-app-cli - arduino-router - remoteocd
  - Bricks and examples: app-bricks-py - app-bricks-examples
  - Linux images: arduino-deb-images - Flasher CLI
- Language specification
  - Language discussions
  - Abstract API specification
  - Reference docs
- Cores: AVR - megaAVR - SAMD - SAM - Mbed - Renesas - Zephyr
- Library registry
- Documentation
  - docs.arduino.cc sources
  - support.arduino.cc sources
  - Built-in examples

- GitHub Actions: arduino-lint-action - compile-sketches - report-size-deltas

Maintaining these projects and handling community contributions is a hard job. Please support us by buying original Arduino products.

## ✨ How you can contribute

- **Triage** open issues: try to reproduce issues reported by other users and confirm whether you can experience them as well, or ask users for more details if needed. Spot duplicates. Improve descriptions. Help users who ask for support.
- **Submit** fixes and implementations: pick an open issue or feature request that you think you can implement yourself, and submit a pull request with an implementation.
- **Test** open pull requests: try to run the proposed modifications and report your success or failure. Testing on real hardware takes time and any help in this will speed up our responsiveness in merging contributions.
- **Help others** contribute by reviewing their code and suggesting good ways to implement fixes and features.
- **Write documentation** and improve the existing content.

We value contributions and we provide the most active and constant contributors with public recognition and hardware goodies.

## 🔒 Security

To report potential vulnerabilities, please see our security policy.

Pinned

**arduino-ide** Public

Arduino IDE 2.x

TypeScript 3k 584

**arduino-cli** Public

Arduino command line tool

Go 4.8k 466

**Arduino** Public

Arduino IDE 1.x

Java 14.5k 7k

**ArduinoCore-API** Public

Hardware independent layer of the Arduino cores defining the official API

C++ 291 142

**library-registry** Public

The Arduino Library Registry

366 2.5k

**docs-content** Public

Arduino documentation (docs.arduino.cc)

Python 329 537

## Repositories

Find a repository...

Type Language Sort

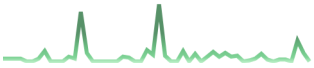
**library-registry** Public

The Arduino Library Registry

366 CC0-1.0 2,456 1 9 Updated 2 hours ago

**tooling-project-assets** Public

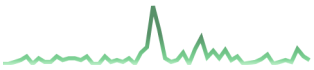
A collection of reusable assets for Arduino tooling projects



Python 17 CC0-1.0 6 6 9 Updated 4 hours ago

**arduino-lint** Public

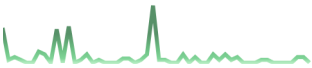
Tool to check for problems with Arduino projects



Go 127 GPL-3.0 13 13 10 Updated 14 hours ago

## arduinoOTA Public

Tool for uploading programs to Arduino boards over a network



Go 38 GPL-3.0 11 1 2 Updated 14 hours ago

## setup-task Public

GitHub Actions action to make Task available for use in your workflow

TypeScript 147 GPL-3.0 22 2 8 Updated 14 hours ago

## arduino-lint-action Public

GitHub Actions action to check Arduino projects for problems

TypeScript 56 Apache-2.0 9 4 10 Updated 14 hours ago

## compile-sketches Public

GitHub Actions action that checks whether Arduino sketches compile and produces a report of data from the compilations

Python 86 GPL-3.0 16 12 7 Updated yesterday

## report-size-deltas Public

GitHub Actions action that comments on pull requests with a report of change in memory usage of Arduino sketches

Python 20 7 4 5 Updated yesterday

## forum-assets Public

Tracker and collaborative development of Arduino Forum assets

Mermaid 4 CC0-1.0 7 5 2 Updated yesterday

## app-bricks-examples Public

The example code for the Arduino UNO Q board

22 MPL-2.0 20 3 4 Updated yesterday
